Great let me know.

As for me, I used the 15spf in Punta Mita Mexico in January. I was in the pool a lot with the baby and in the sun all day and I did not burn at all. I still used Shelter on my face for backup which my daughter took because she loved it. She used the UV 15 too and didn't burn. We got the nicest tan. I burn in 10 minutes normally, Irish white skin
