

Wearing Adult Diapers or Padded Underwear is No Longer Necessary

According to Dr. Seipel, Leaking, Squirming, Squeezing, and Embarrassing Odors...Even Accidents Can Now be a Thing of the Past!

NEW YORK, NEW YORK — If life isn't hard enough, now you have to worry about making it to the bathroom in time. The feeling of your bladder bursting and the down right panic of "not making it" in time can be absolutely over-whelming.

God forbid you have to laugh, cough or sneeze at the "wrong" time and when did you start to become scared to take a big sip of tea, coffee or water?

You're not alone in your battle to control your bladder. According to The National Institute of Health, as many as 33 million Americans are affected by bladder control issues described above.

The Family Secret Even the Family Doesn't Know

"Most people who have overactive bladders choose to keep their problem a secret," says Dr. Tracey Seipel, a long-time clinician who is one of the world's leading experts in natural urological health care.

"They don't even tell their spouse or families about it. It affects their lives in every way, influencing where they go, and even what they will wear in case they have an accident."

"Black is the color of choice," says Dr. Seipel, "as it can hide evidence of public accidents."

A 100% natural, drug-free solution developed by Dr. Seipel is now available in a remarkable, fast-acting natural formula called Bladder Control.

This sophisticated herbal compound has been shown in clinical studies to improve bladder control with reductions in bladder frequency, nocturia (having to urinate at night), urgency, and bladder discomfort, sometimes in as little as two weeks.

No More Running to the Toilet

Since its introduction in Australia, more than 25,000 people have successfully used the Bladder Control formula.

Store shelves are overflowing with adult diapers and absorbent underwear

"Those medications can cause memory loss and have a distressing drying effect on the body, causing blurred vision, constipation, dry mouth, nausea, and other side effects," says Dr. Seipel.

Adios to Adult Diapers

"Overactive bladder syndrome and/or urinary incontinence are widespread problems," says Dr. Seipel. Many of these individuals wear adult diapers.

Insiders in the adult diaper industry are keeping a close eye on Dr. Seipel's bladder support breakthrough because of people like 78-year-old retired teacher, Glenda B. from Gold Coast, Australia.

Glenda wore adult diapers every day to guard against accidents.

"My bladder capacity was good but the leakage and accidents would occur a few times a day without warning. So, I wore them every day," confesses Glenda.

Dr. Seipel's formula has made a believer out of 45-year-old, mother of three, Brandy W., from Brisbane, Australia.

"I had a high bladder frequency as a child," says Brandy, "but my frequency really worsened after the birth of my first child."

A friend who was aware of Brandy's condition told her about Dr. Seipel's formula. "After two weeks, I had already noticed changes," smiles Brandy.

"I was finding that although I felt I needed to urinate, I wasn't desperate to run to the toilet. Now, when I get up in the morning," she adds, "I'm able to make the coffee and even have a cup before needing to go, which is a great improvement!"

Diabetes Educator

How Does It Work?

"Bladder Control helps aging bladders feel and function years younger by revitalizing bladder tone and function, and by helping improve kidney health," says Dr. Seipel.

"Bladder Control promotes normal urinary frequency, and reduces urgency, nocturia and those embarrassing, away-from-home bladder accidents," adds Dr. Seipel.

"The compound invigorates the tone of the bladder wall, restoring a healthy level of firmness by enhancing the bladder's muscular elasticity. This reduces the frequent urge to urinate," explains Dr. Seipel.

Positive Clinical Trials

This natural, drug-free Bladder Control formula has performed well in clinical studies.

In one early controlled, randomized trial, participants saw results in as little as two weeks. But the best was yet to come.

Two weeks later, participants shocked study observers by reporting an astounding 88% improvement in their quality of life.

Thirty days later, every study participant, 100% of them, reported that their quality of life had improved markedly.

Results like these are not surprising to Dr. Seipel who single-handedly pioneered the bladder care category in the early 2000's, receiving an award from the prestigious *US Nutrition Business Journal* for her work.

Her patent-pending formula consisting of select, synergistically paired botanicals like *Crateva nurvala*, *Equisetum arvense* and *Lindera aggregata*, was 15 years in the making.

Dr. Seipel searched for an effective, alternative treatment to prescription drugs.

Since Glenda discovered Dr. Seipel's Bladder Control formula, you won't find her shopping in the adult diaper section of the store anymore.

"After only 10 days on Bladder Control, I stopped wearing my diapers. Now, I am managing very well, thank you," says Glenda. According to Euromonitor International, a respected market research firm, the size of the adult diaper market in the U.S. was approximately \$1.4 Billion in 2012.

Prostate or Bladder? Hard to Tell

Many men confuse the symptoms of overactive bladder syndrome with prostate woes.

Dr. Seipel explains, "Prostate enlargement restricts urine flow. The bladder compensates for this by trying harder and harder to push the urine out."

"This causes structural changes to the bladder," adds Dr. Seipel, "Causing bladder walls to thicken and lose elasticity."

As bladder pressure increases, so does instances of urinary frequency and urgency.

Long after a man's prostate woes are relieved, he may still experience the same symptoms thanks to his now-overactive bladder.

His-and-Her Results

"Because male and female bladders, other than size, are identical," says Dr. Seipel, "the formula works equally well for both men and women".

"It's a his-and-her formula," she smiles. David M., age 46, can attest to this. "I was having to go to the toilet every hour or so and I had to go to the toilet at least four times per night."

Four weeks after starting Bladder Control, David says, "My trips to the toilet have definitely reduced and I'm having much better sleep, getting up maybe once a night."

If you're ready to put an end to your go-now urination urges, to those frantic trips to the bathroom, and if you are looking for the confidence and security that a healthy bladder can bring to your life, here's your risk-free opportunity.

Special Opportunity for Our Readers

Dr Seipel has arranged (for a limited time) to provide our readers a full 60 days to try Bladder Control at home completely Risk Free. That's how confident she is that it will work for you.

And... if you call today we are offering a limited number of FREE 30 day bottles as part of our "Fix My Bladder" special promotion. Call now for details at 1-800-679-5746.

In as little as four weeks, you could be sleeping through the night, taking long trips in the car again, and feeling confident and self-assured all without adult diapers or absorbent underwear. Put those padded underwear and adult diapers back on the shelf where they belong. But don't wait. Supplies are very limited. Call now at 1-800-679-5746.
